

MIXED USE DEVELOPMENT – COMMERCIAL & RESIDENTIAL

Hannas Group of Companies

Lilyfield, N.S.W.

The Lilyfield development consists of a five-storey building comprising a mix of commercial space on the lower levels and residential apartments on the remaining upper levels and includes basement parking over two levels.

The building is of contemporary design with a carefully developed range of materials and articulated facades that provide a harmonious transition to the character of the adjacent neighbourhood.

The development will be ecologically sustainable, including the re-use of water collected from the roofs, energy efficient design with passive solar control devices and natural ventilation.

The proposed development is conveniently located within the business zone of the 'Catherine Street neighbourhood Centre' with the Sydney CBD minutes away due to the close proximity to the Lilyfield Light Rail Network as well as existing bus routes
