

CIVIL MAINTENANCE PROGRAM

Shell Refinery (Aust) Pty Limited

Clyde, N.S.W.

The Clyde Refinery covers an area of over 80 ha, and has more than 14 km of internal roadways. Hannas Civil Engineering Pty Ltd, as an alliance partner with Transfield Services Limited, is responsible for all civil engineering works undertaken as part of the overall refinery maintenance program.

In addition, Hannas also undertakes civil construction project works for capital improvements and extensions to the refinery. In some instances Hannas undertakes projects on a design and construct basis, in others Hannas works closely with the designers, providing advice and guidance to achieve the most economical design possible.

The refinery environment and industry regulations demand extremely high levels of safety, quality control and environmental management. Hannas has the appropriate systems in place to ensure that all activities are executed to comply with these high standards.
