

## WESTERN CORRIDOR RECYCLED WATER PROJECT

Eastern Pipeline Alliance (Transfield Services, AJ Lucas & GHD)

South East Queensland

The Western Corridor Recycled Water Scheme project involves the construction of several pipelines, water treatment plants and pump stations. An "Eastern Pipeline Alliance", consisting of State of Queensland, Transfield Services (Australia) Limited, A.J.Lucas Group Limited, McCall's Pty Ltd, Sun Water and GHD Pty Ltd has been formed for the engineering, procurement & construction of works including the Luggage Point to Bundamba pipeline and Oxley to Bundamba pipeline.

Hannas were awarded the civil construction work associated with the Pump Stations and Storage Tanks at three locations:

- Goodna
- Oxley Creek
- Wacol

The scope of work for construction of these Pumping Station includes excavation, shoring, dewatering, precast driven piling, supply and compacting of underlay, supply and lay concrete and reinforcement, block work 225 thick, backfilling, surface restoration, soil disposal, soil stockpiling, cast in items and the installation only the inlet / outlet pipes.

The scope of work for construction of these Storage Tanks includes excavation, shoring, dewatering, supply and compacting of underlay, supply and lay concrete and reinforcement, backfilling, surface restoration, soil disposal, soil stockpiling, cast in items and the installation only the inlet / outlet pipes.
